# About Us

We install windows, doors and more, at an affordable price and within a reasonable timeframe. Our customers know that they can rely on us to install products that best fit their requirements, and which will last. We are happy to offer advice before, during and even after a project's completion, on anything from what to choose, to how to care for it. Every member of our team has over ten years of experience in the industry, allowing us to provide customer satisfaction every step of the way.

With over 30 years of collective experience, the founders decided to start their own window and door installation company, where the needs of the customer are always put first. They aim to deliver the highest level of customer satisfaction and continue to do so as you can see from the glowing reviews provided by our lovely clients.

# Products

## uPVC Windows

uPVC, also known as Unplasticized Polyvinyl Chloride is a strong, low-maintenance plastic material. This lightweight material has become popular in the industry as an alternative to painted wooden windows. The benefits of uPVC windows are energy efficient, cost-effective, sound protective, secure and low maintenance.

PVC and PVCU are also common terms for these windows.

## Timber Windows

Timber windows are pleasing to the eye, and are still able to perform in the cold British weather. They are a great for insulation and sound-proofing as well as longer lasting. In addition, they are stable and immobile with a range of designs to choose from.

## Aluminium Windows

Aluminium windows are durable powder-coated metal frames, they allow for more glass with slimmer frames for your budget, which are a great long-term investment. They are a popular alternative to uPVC windows

The benefits of aluminium windows are slimmer frames, thermal efficiency, secure, long-lasting, durable and easy to maintain.

## Casement Windows

Casement windows are one of our most popular products, with each window designed specifically to your home, along with the 10-year guarantee, these windows are high quality, energy-efficient and secure. The benefits of casement windows are increased light into your home, energy efficient, secure, sound-proofing and additional heat retention if you opt for triple glazing.

## Bay Windows

Bay windows are a great way to add a feature window to your home, by using 3 or more panes, the window extends outwards in an arc shape which increases your internal space and allows for panoramic views outside your home. These are available in uPVC, Timber and Aluminium and are bespoke for your home.

## Sash Windows

Sash windows are the perfect window for older buildings to ensure they fit their aesthetic. With these traditional looking windows being available in both uPVC and timber, there are plenty of options to choose from to achieve your desired result.

## Crittall Style Windows

Crittall style windows is the term for the black steel or aluminium frame with glass panels. These windows originally come from the Crittall family who originally manufactured the product.

## Skylights

Skylights are installed on traditional style pitched roofs but can also be installed on flat roofs. There are a large variety of styles which are dependent on the type of roof they are required on.

The benefits of a skylight are to allow for large amounts of natural light to brighten up a room, they can also be fitted with a motor to allow for ventilation.

## Bi-Folding Doors

Bi-fold doors allow for a seamless link between interior and exterior living. They are available in aluminium in a range of colours, and allow for panoramic views of the outdoors and their ease of use due to the sliding track make them a popular option. When open, the panels can be arranged to sit on either side or in the middle of the frame.

## Patio Sliding Doors

Patio Sliding Doors are the perfect choice for expansive views, they are one of the most popular doors amongst the UK market. They are available in uPVC and Aluminium with a variety of colours. The sideways opening allows for you to save a lot of floor space in your home.

The benefits of Patio Sliding Doors are the high levels of security as well as the large panes of glass allowing for huge amounts of natural light to fill your home.

## Composite Doors

Composite doors are secure, energy efficient, cost-effective and reliable. We offer these in a number of different styles, for front doors, back doors, patio doors and french doors.

These doors allow you to add a unique feature to your home, as each design is completely different. Composite doors are also highly reliable as they can last more than 30 years without any varnishing or re-painting. We also offer uPVC doors to our clients upon request.
